Info Disc springs acc.
to » DIN 2093 A
are mostly used in
critical applications
with safety first.
Similar applications
can be found
in for example
safety torque
limiter clutches,
hinge stiffeners
and applications
of constant
roll pressure.
Because of the right
combination c.q.
stacking of the disc
springs the elasticity
and/or deflection can
be dosed accurately.
The technical

specifications of the disc springs above meet the highest expectations with reference to the static and dynamic load. Heat treatment gives a copper-bronze colour to this disc springs.
