|              |                               |
|--------------|-------------------------------|
| PKG. van 250 | Alleen volledige verpakkingen |
|--------------|-------------------------------|

### Technische parameters

|          |           |
|----------|-----------|
| Diameter | 5/32 Inch |
|----------|-----------|

|        |      |
|--------|------|
| Klasse | Gr.A |
|--------|------|

|                     |         |
|---------------------|---------|
| Aandraaivoorziening | Zeskant |
|---------------------|---------|

|                |                |
|----------------|----------------|
| Materiaalsoort | Automatenstaal |
|----------------|----------------|

|               |        |
|---------------|--------|
| Draadrichting | Rechts |
|---------------|--------|

|                      |       |
|----------------------|-------|
| Oppervlaktebedekking | Blank |
|----------------------|-------|

|            |                            |
|------------|----------------------------|
| Draadsoort | British Standard Whitworth |
|------------|----------------------------|

|                 |    |
|-----------------|----|
| Gangen per Inch | 32 |
|-----------------|----|

|      |                                                                                                                                                                                                                                                                          |
|------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Info | Whitworth schroefdraad (BSW/BSF) wordt internationaal niet aanbevolen. Geadviseerd wordt voor nieuwe constructies metrische (M/MF/MEF) of unieschroefdraad (UNC/UNF) te gebruiken. Afhankelijk van de verkrijgbaarheid kunnen de afmetingen enigszins afwijken. gedraaid |
