### Technical Parameters

|                                |                  |
|--------------------------------|------------------|
| Application                    | Grinding         |
| Max. number of revolutions     | 12000            |
| Diameter                       | 125              |
| Type                           | Disc             |
| Disc diameter                  | 125              |
| Granulation                    | 36               |
| Suitable for plastic           | Yes              |
| Suitable for steel             | Yes              |
| Suitable for metal             | Yes              |
| Bore diameter                  | 22               |
| Suitable for wood              | Yes              |
| Suitable for nonferrous metals | Yes              |
| Particle type                  | Corundum         |
| Granulation according to CAMI  | 36               |
| Hole pattern                   | Star-shaped hole |
